# Code Crunch

Rules for code crunch

1. A team must consist of 2 participants and each member should belong to the same college

2. The competition will consist of 2 rounds

**Round 1: The MCQ round**

- Here contestants will have to log in to an online platform( details will be provided) where the questions will be put up. Evaluation will be done online

- The questions will be based on simple programming languages concepts.

- Based on the number of total participants in round 1, 4-8 teams will be shortlisted for round 2

## Round 2: The Coding round

- This round will consist of 3-4 coding questions which will be evaluated by the means of an online compiler

- TAKE NOTE: Make a HackerEarth Account, as this is the platform we will be using. One team member can make an account for the same.
  **It would be better if you familiarize yourself with the HackerEarth Website AND the compiler beforehand!**
  **Practicing WILL ALSO BE HELPFUL.**
- Teams can code in any programming language. For details about languages supported kindly go to http://tinyurl.com/CodeCrunch
- Machines will be provided on request, but they MAY NOT have development environment installed. Hence its advisable to carry your own laptops.
